Industrial Engineering (IE) B.S.

The Institute of Industrial and Systems Engineers (IISE) defines Industrial Engineering as:

Industrial Engineering is concerned with the design, improvement, and installation of integrated systems of people, materials, information, equipment, and energy. It draws upon specialized knowledge and skill in the mathematical, physical, and social sciences together with the principles and methods of engineering analysis and design, to specify, predict, and evaluate the results to be obtained from such systems.

Industrial Engineering is emerging as one of the vital professions that can be counted on for solving complex problems in a highly technological world. Industrial engineers are confronted with a host of challenging situations ranging from manufacturing and cost estimating to the design of complex systems. They are needed in all kinds of industries and are employed by a variety of organizations including hospitals, banks, engineering firms, petrochemical industries, airline companies, government and military agencies, computer and software firms, and manufacturing.

Industrial Engineering at Texas A&M University-Commerce emphasizes the application of concepts, principles, and managerial skills required in contemporary business and industry. The program of study:

- · reflects current and future business and industry practices and competencies
- prepares students for the high-tech engineering world of today and of the future
- · develops analytical, critical, and problem-solving skills
- · develops leadership skills
- · promotes student and faculty interaction with business, industry, and professional organizations
- · promotes student and faculty research activities

Graduates of the Bachelor of Science in Industrial Engineering program at Texas A&M University-Commerce will...

- Function effectively within an engineering profession or graduate program by drawing upon IE skills and knowledge, as evidenced by, but not limited to, continuous employment or successful progress towards a graduate degree.
- Progress within the engineering profession as evidence by, but not limited to leaderships roles, value added within a team, increased responsibility with decision making, or creation of better or more effective products, processes, technologies, or ideas.
- Engage in life-long growth within the industrial engineering profession as evidenced by, but not limited to, company training, industry certifications, professional conferences, and graduate work.

IE Student Outcomes

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors

3. an ability to communicate effectively with a range of audiences

4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The Bachelor of Science in Industrial Engineering is accredited by: The Engineering Accreditation Commission of ABET, http://www.abet.org

Core Curriculum Courses

See the Core Curriculum Requirement	nts (http://coursecatalog.tamuc.edu/undergrad/core-curriculum-requirements/)	42
Required courses in the major		
ENGR 110	Introduction to Engineering and Technology	3
ENGR 1304	Computer-Aided Design (CAD)	3
ENGR 113	Product Design and Development	3
ENGR 2304	Computing for Engineers	3
ENGR 2308	Engineering Economic Analysis	3

Total Hours		126
PHYS 2426	University Physics II (4 sch)	4
PHYS 2425	University Physics I (4 sch) *	
or ECO 2302	Principles of Micro Economics	
ECO 2301	Prin Macro Economics (3 sch) *	
MATH 2318	Linear Algebra	3
MATH 2320	Differential Equations	3
MATH 2414	Calculus II	4
MATH 2413	Calculus I (4 sch) *	
COSC 1436	Introduction to Computer Science and Programming	4
CHEM 1111	General and Quantitative Chemistry Laboratory I	
CHEM 1311	General and Quantitative Chemistry I [*]	
Required support courses	-	
IE 495	Industrial Systems Design	3
IE 486	Service Systems Analysis	3
IE 471	Planning for Industrial System Design	3
IE 444	Systems Engineering	3
IE 431	Manufacturing Support Systems	3
IE 410	Systems Simulation	3
IE 409	Work Design	3
IE 403	Human Factors Engineering	3
IF 318	Analysis of Production Systems	3
IF 314	Statistical Quality Control	3
IE 312		3
IE 312	Industrial Operations Research	3
IE 305	Advanced Engineering Statistics	3
ENGR 411	Engineering Management	3
ENGR 213	Engineering Probability and Statistics	3
ENGR 2303	Engineering Mechanics- Statics and Dynamics	3
	Franciscovica Machanica, Otatica and Dunamica	0

*

These courses should be used to satisfy the Core Curriculum Requirements in Social and Behavioral Science, Natural Sciences, and Mathematics, respectively; otherwise, the credit hours required to earn the B.S. in IE will exceed 127.

A grade of "C" or higher must be earned in all courses in this Major.

Freshman
