

Astronomy Minor

A minor in Astronomy provides another option especially for students majoring in Arts and Social Sciences to get a degree in science that is not math intensive but very interesting and appealing.

Required Courses

| | | |
|--------------------------------------|---|----|
| ASTR 1303 or ASTR 203 | Stars and the Universe Introduction to Astronomy and Astrophysics | 3 |
| ASTR 1103 | Introductory Astronomy Lab | 1 |
| ASTR 1304 | Solar System | 3 |
| PHYS 401 | Current Topics in Physics and Astronomy (1 sh, must be repeated for total of 2sh) | 2 |
| Minimum 10 hours from the following: | | 10 |
| ASTR 120 | Life in the Universe | |
| ASTR 260 | GLB/Archaeoastronomy | |
| ASTR 310 | Observational Astronomy | |
| ASTR 337 | Contemporary Frontiers in Astronomy | |
| ASTR 410 | Stellar Structure and Evolution | |
| ASTR 420 | Galaxies and Cosmology | |

| | | |
|--------------------|--|-----------|
| Total Hours | | 19 |
|--------------------|--|-----------|
