## Physics B.A./B.S. with Emphasis in Astrophysics

The emphasis in Astrophysics is designed for students interested in pursuing a career and advanced study in astronomy and astrophysics. The degree program contains a strong core of physics and mathematics courses which provides the desired breadth and academic rigor to prepare the student for entry into any of the many subfields of modern space-related careers (for example, space science and technology, planetary science, astrobiology, etc.).

The emphasis in Astrophysics is designed for students interested in pursuing a career and advanced study in astronomy and astrophysics. The degree program contains a strong core of physics and mathematics courses which provides the desired breadth and academic rigor to prepare the student for entry into any of the many subfields of modern space-related careers, including astronomy and astrophysics, space science and technology, planetary science, and astrobiology.

Core Curriculum Courses
See the Core Curriculum Requirements (http://coursecatalog.tamuc.edu/undergrad/core-curriculum-requirements/)

## Required courses in the major

| PHYS 101 | Physics and Astronomy Seminar | 1 |
| :---: | :---: | :---: |
| PHYS 119 | Introduction to Python Computer Programming for the Physical Sciences | 1 |
| PHYS 2425 | University Physics I* |  |
| PHYS 2426 | University Physics II | 4 |
| ASTR 203 | Stars and the Universe for STEM Majors | 3 |
| PHYS 317 | Mathematical Methods for Physics and Engineering | 3 |
| PHYS 319 | Computational Physics with Python | 3 |
| PHYS 321 | Modern Physics | 3 |
| PHYS 333 | Wave Motion, Acoustics, and Optics | 4 |
| PHYS 335 | Advanced Physics Laboratory | 3 |
| PHYS 401 | Current Topics in Physics and Astronomy (1 sh, must be repeated for total of 2 sh) | 2 |
| PHYS 411 | Classical Mechanics | 3 |
| PHYS 412 | Electricity and Magnetism | 3 |
| PHYS 414 | Thermodynamics and Kinetic Theory | 3 |
| PHYS 420 | Quantum Mechanics | 3 |
| ASTR 310 | Observational Astronomy | 4 |
| ASTR 410 | Stellar Structure and Evolution | 3 |
| ASTR 420 | Galaxies and Cosmology | 3 |
| PHYS or ASTR or MATH (Advanced) |  | 3 |
| Required Support Courses** |  |  |
| MATH 2413 | Calculus I (4 hours) |  |
| MATH 2414 | Calculus II ${ }^{\text { }}$ |  |
| MATH 2415 | Calculus III | 4 |
| MATH 2320 | Differential Equations | 3 |
| CHEM 1311 | General and Quantitative Chemistry I * |  |
| CHEM 1111 | General and Quantitative Chemistry Laboratory I | 1 |

## Second Major or Minor or Electives Required

$18-24$ semester hours required in second major or minor or electives 18-24

## Total Hours

* 

This course should be taken to fulfill Core Curriculum Requirements
**
These courses may apply to the second major or minor A grade of "C" or higher must be earned in all courses in this Major.

## Notes

- Suggested second majors include mathematics, chemistry, computer science, and biology. Other choices are possible.
- Planning for a second major should not be delayed beyond the middle of the sophomore year. A minor in a second subject may be chosen instead of a second major. The choice of mathematics as second major allows for four additional courses to be elective. Many students select minors in both mathematics and computer science.
