## Learning & Technologies

An undergraduate degree program leading to the Bachelor of Science degree with a major in Learning & Technologies is available.

The Learning & Technologies program is designed to prepare entry level personnel into the field of training and development from a global perspective.

The major is composed of a minimum of thirty-six (36) semester hours incorporating elements of professional education and digital content, plus eighty-four (84) hours of career field coursework, university studies requirements, and electives which maybe transferred in from another institution.

The Bachelor of Science in Learning & Technologies equips entry-level personnel in the field of eLearning (adult training and development) for practice in public education, private education, business, industry, and non-profit organizations. Learning & Technologies are intertwined to develop next generation trainers and leaders to implement technology and learning strategies across curricula and classrooms of all kinds.
